OGIMORA Test plates

Which tab clearance fits your machine?

TEST SITE

1 Cut

key

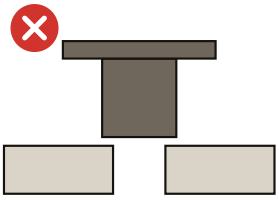

△ **0.1 mm** – start here (smallest clearance)

○○○○ **big dots = sheet thickness**
4 dots = 4 mm

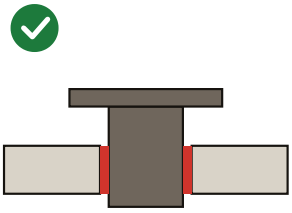

○○○○ **dots by a side = clearance**
4 dots = 0.4 mm

in the file: 2 plates (0.1–0.6 and 0.7–1.2 mm) and a key

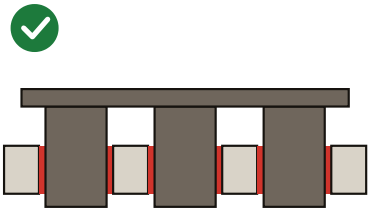

2 Try the key

does not go in
next side →

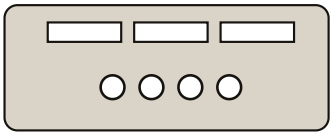

goes in by hand
no hammer, no grinding

then 3 tabs at once
no? take the next side

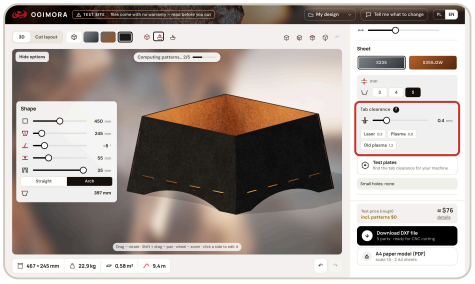

3 Count the dots

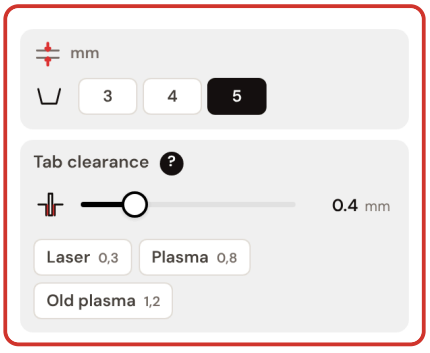

→ **0.4 mm**

first side that takes all 3 tabs
number of dots ÷ 10 = clearance in mm

4 Set the slider

The “Tab clearance” slider
right panel, below sheet thickness. Set the result from the plate, then download the fire pit file.

The files are made by a script. The plates have not yet been cut in steel – they may contain errors. You cut at your own risk.
